PROFESSIONAL SUMMARY

Software Developer specializing in Artificial Intelligence and Machine Learning. Possesses hands-on experience in building predictive models, optimizing cloud data systems, and developing advanced computer vision and NLP applications. Highly proficient in Python and Java, with a strong foundation in full-stack web development and data-driven problem solving.

EDUCATION

Techno Engineering College Banipur <i>Bachelor of Technology in Computer Science and Engineering</i> – Cumulative GPA: 7.35.	West Bengal, India Aug. 2024 – Present
Ramakrishna Mission Shilpapitha <i>Diploma in Electronics and Telecommunication Engineering</i> – Final Score: 76.5%.	West Bengal, India Aug. 2021 – May 2024
Purba Barasat Adarsha Vidyapith <i>Higher Secondary [Vocational Engineering and Technology]</i> – Final Score: 78.2%.	West Bengal, India Aug. 2019 – May 2021

EXPERIENCE

VaultofCodes <i>Ethical Hacking & Cybersecurity Intern</i> – Completed an intensive 1-month internship and training program focused on core ethical hacking methodologies and modern cybersecurity protocols. – Executed simulated vulnerability assessments and applied security best practices to analyze and safeguard digital infrastructure.	Remote Jul. 2026 – Aug. 2026
InAmigos Foundation <i>AI Data Analytics Intern</i> – Conducted comprehensive data analysis and applied artificial intelligence methodologies to extract actionable insights from complex datasets. – Collaborated on data-driven projects, utilizing analytical tools to optimize data processing and visualization workflows.	Remote Jul. 2026 – Aug. 2026
Yuga Yatra Retail (OPC) Private Limited <i>Software Developer Intern</i> – Engineered scalable software solutions to optimize internal retail applications and data workflows. – Collaborated with remote development teams to implement new features and streamline system performance.	Remote Mar. 2026 – May 2026
Techno Billion AI <i>Industrial Trainee - Python Programming</i> – Completed a comprehensive industrial training program focused on advanced Python programming and application development. – Applied core programming concepts to industry-standard problem-solving scenarios and technical workflows.	Habra, India Dec. 2025 – Jan. 2026

PROJECTS

MAA Voice Assistant | *Python, OpenAI API, NLP*

Mar. 2026

- Programmed a conversational AI assistant utilizing OpenAI APIs and speech recognition libraries for dynamic voice synthesis.

Smart Attendance System | *Python, Computer Vision*

Mar. 2026 – May 2026

- Architected an automated attendance tracking application deploying advanced facial recognition algorithms.

AI Job Recommendation System | *Python, scikit-learn*

Jan. 2024 – Mar. 2024

- Engineered a predictive model utilizing machine learning algorithms to match user skills with job requirements.

Superstore Sales Forecasting System | *Python, Machine Learning*

Nov. 2023 – Dec. 2023

- Developed a demand forecasting tool utilizing machine learning to identify retail trends from historical superstore data.

IoT Data Collection System | *Arduino, Embedded C*

Feb. 2023 – Mar. 2023

- Constructed an Arduino UNO-based hardware interface for real-time data acquisition, computer visualization, and smartphone control.

TECHNICAL SKILLS

Programming: Python, Java, C, C++, SQL.

AI and Machine Learning: scikit-learn, OpenAI API, Computer Vision, Pandas, NumPy.

Web Development: HTML5, CSS3, JavaScript, Streamlit, Cloud Integration.

Hardware and Tools: VS Code, Git, Arduino Programming, IoT, Proteus Simulation.

CERTIFICATIONS & LEADERSHIP

Leadership: Campus Ambassador for "eDC IIT Delhi - BECon'26 (Jan. 2026)", "CampusCrew (Dec. 2025)".

Courses: NPTEL ('Ethical Hacking', 'Cryptography & Network Security'), Python Programming, HTML-CSS-JavaScript, JAVA.
